Dimpho Manana

Autonomous AI Customer Support System

Built On Salesforce Service Cloud

March 2026

The Problem

- High Case Volume
- Slow Response Times
- Poor Prioritization
- No Visibility Into Trends

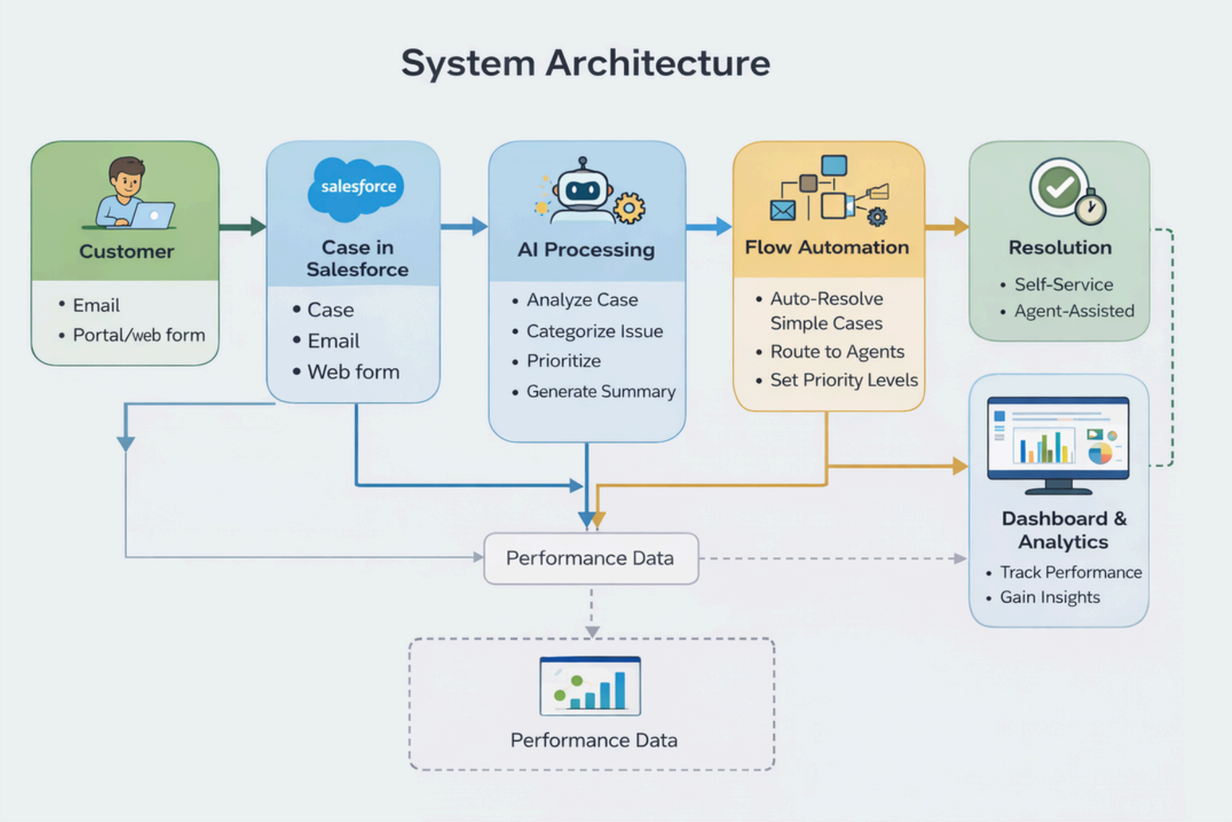
Support Teams Often Struggle With Volume and Prioritization, Leading To Delays And Poor Customer Experience.

The Solution

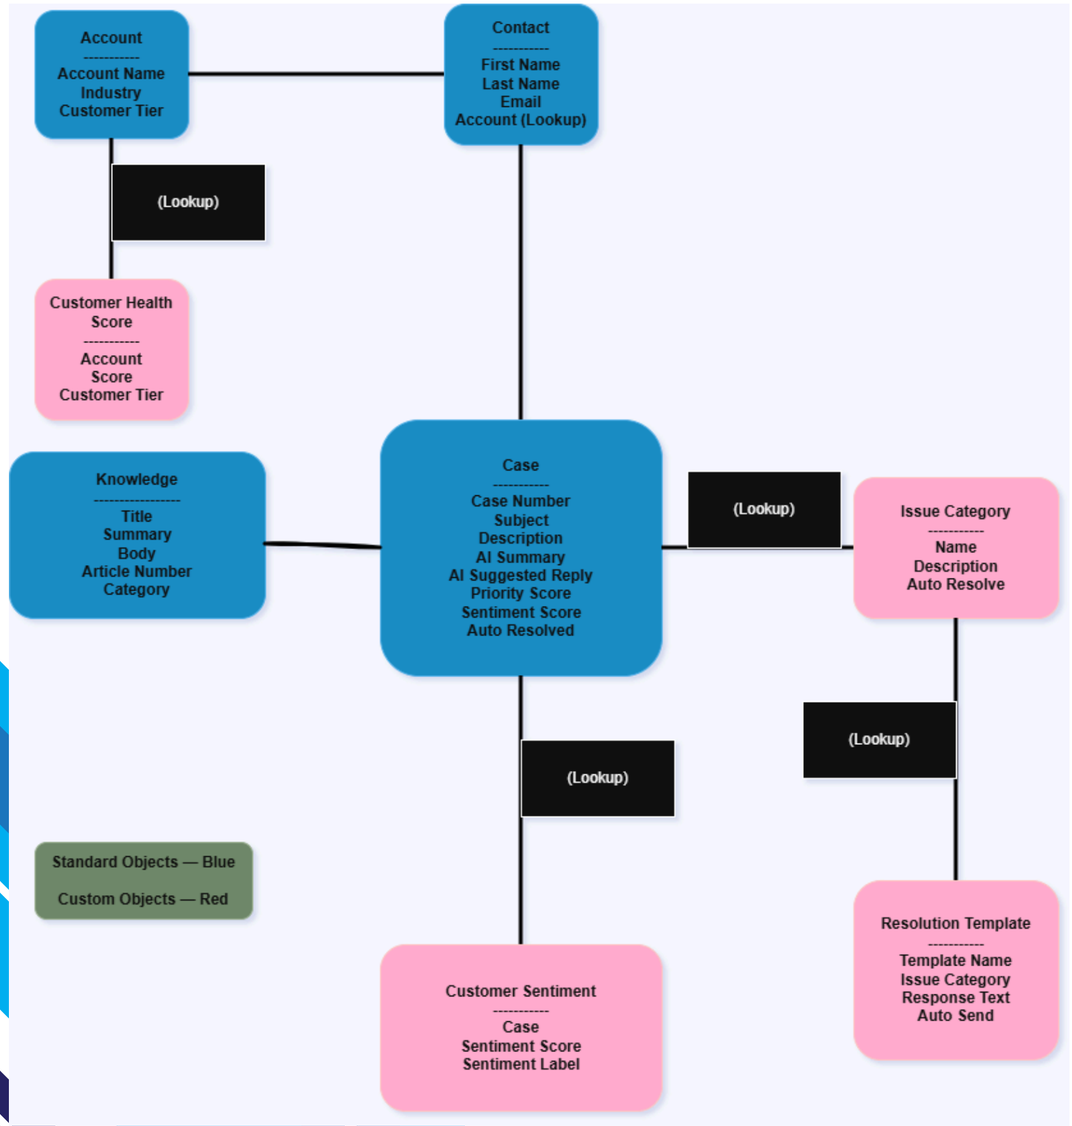
- AI Classification
- Sentiment Detection
- Priority Scoring
- Auto-Resolution
- Real-Time Dashboards

I Designed A System Where AI Assists Agents By Classifying, Prioritizing, And Even Resolving Cases Automatically.

Architecture



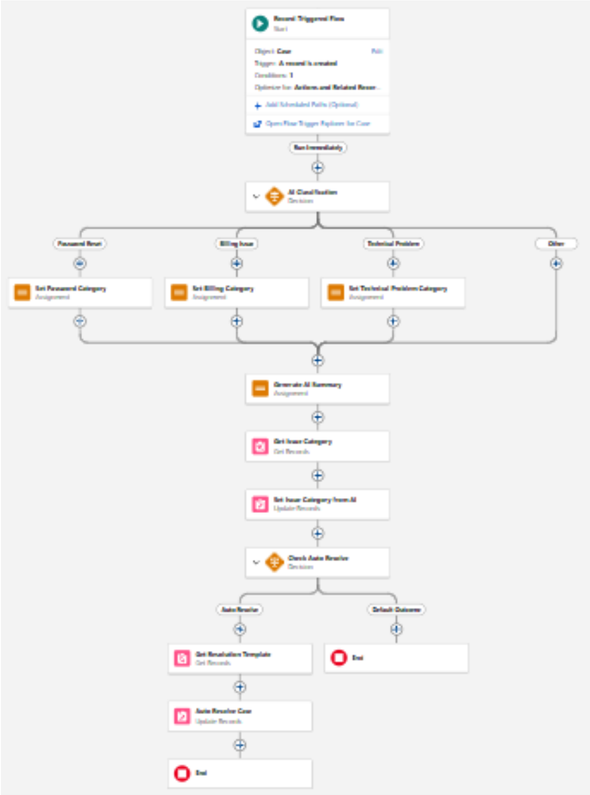
Cases Move Through An AI Layer Built With Flow Logic, Then Move Into Automation And Analytics.

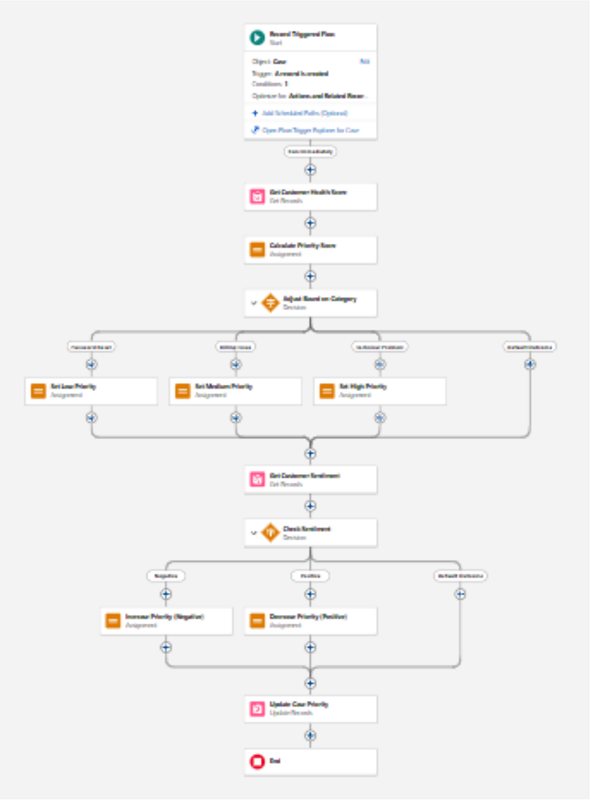


Data Model

I Designed A Scalable Data Model Using Custom Objects Like Issue Category And Customer Sentiment To Support AI-driven Automation.

AI Logic





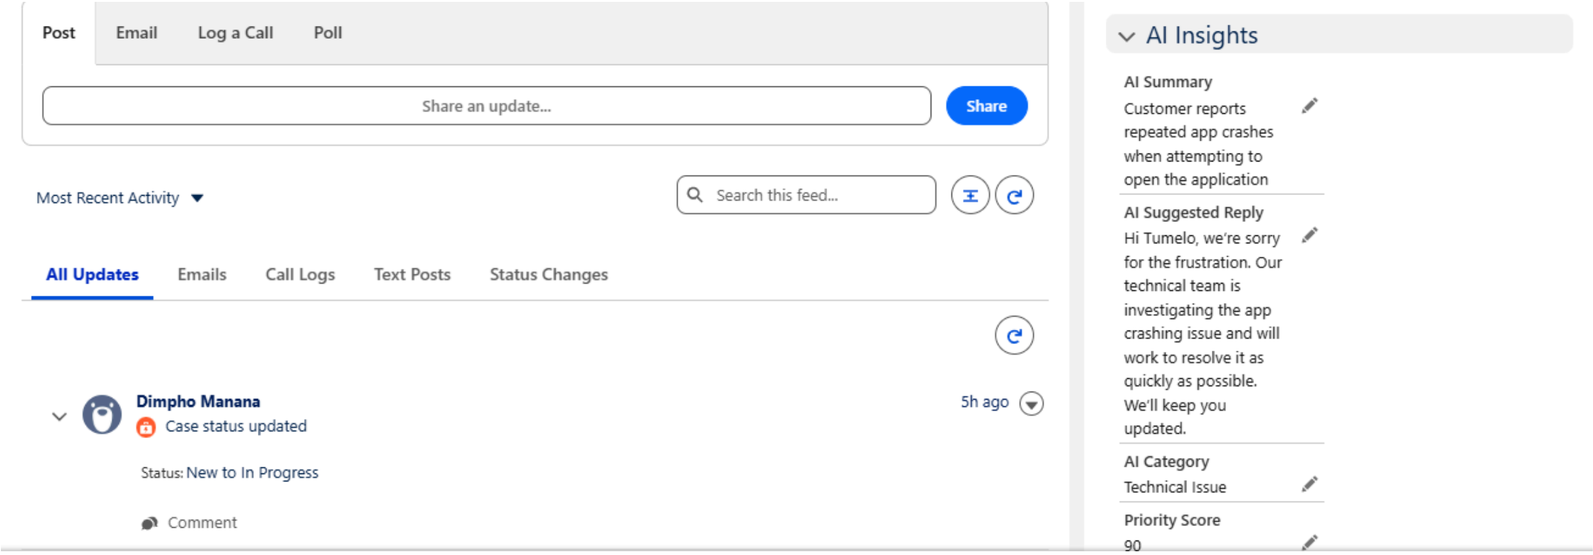
I Simulated AI Using Flow Logic To Classify Cases Based On Keywords.

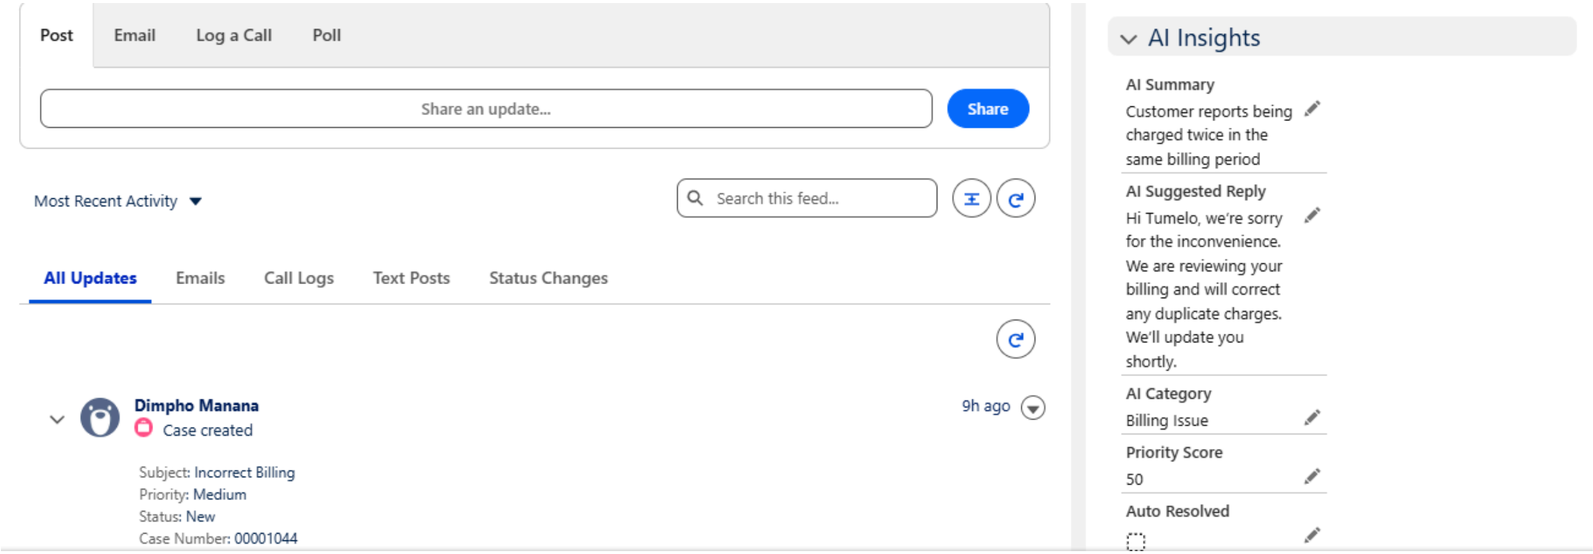
Automation Engine

The System Uses Flow Automation To Assign Priorities, Map Categories, And Trigger Actions Like Auto-Resolution.

Flows Acts As The Core Decision Engine Of The System, Orchestrating AI-like Behavior By Combining Classification Logic, Sentiment-driven Prioritization, And Data Mapping To Automate Outcomes Such As Auto-resolution For Simple Cases and Escalation For High-risk Scenarios.

AI In Action

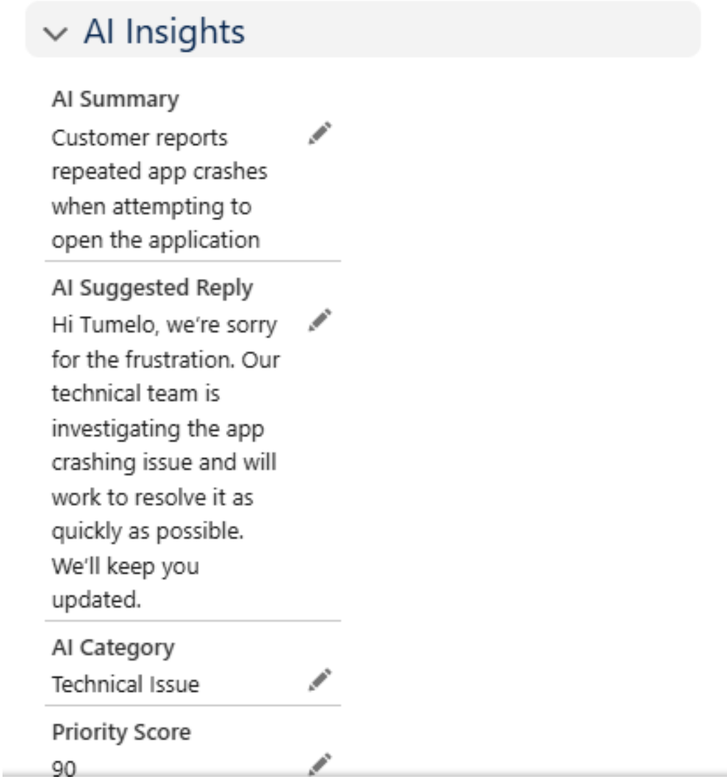




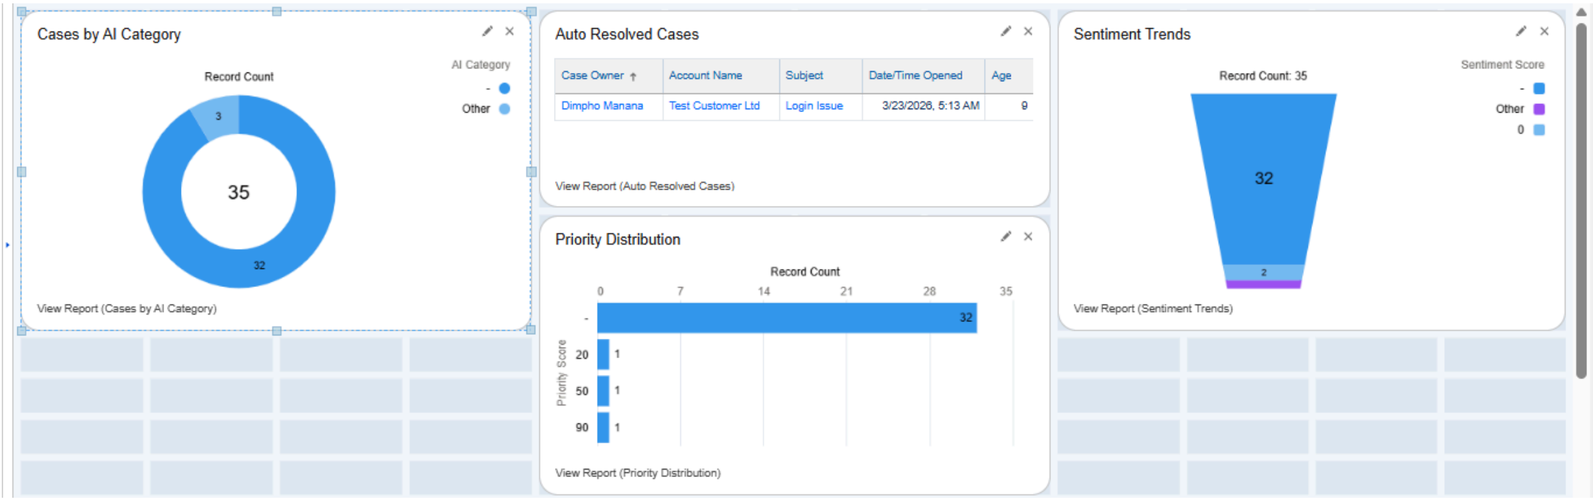
The System Dynamically Handles Different Case Types Based On Complexity And Sentiment.

Agent Experience

Agents Get AI-generated Summaries And Recommendations Directly In Their Workspace.



Dashboards



The Dashboard Provides Insights Into Case Distribution, Priority Levels, Sentiment Trends, And AI Resolution Performance.

Business Impact

By Automating Repetitive Support Tasks And Intelligently Prioritizing Complex Issues, This solution Reduces Agent Workload, Accelerates Resolution Times, And Provides Real-time Insights That Enable More Informed Decision-making.

- Reduced Manual Workload
- Faster Resolution Times
- Better Prioritization
- Improved Visibility

Skills

- Salesforce Service Cloud
- Data Modelling
- App Builder
- Flow Automation
- AI Simulation
- Dashboards

Thank you
